

**Amendments To the Abstract**

In the English translation document, please add the section heading after the Claim Section at page 23 line 5, as follows:

**--ABSTRACT—**

In the English translation document, please insert the following paragraph at page 23 line 5 after the newly added ABSTRACT heading, as follows:

The invention relates to a system for the execution of at least one release license software program which is used to control and/or regulate a tool machine, and/or a production machine and/or a manual automatic machine, wherein the release of the release license software program can be obtained by means of a license key. A license key handler is provided for the release thereof. The invention also relates to a corresponding method. If the system comprises various release license software programs the handling of the release and/or licensing can be correspondingly expensive and complicated. A license key handler manager enables said process to be simplified. Said license key handler manager can be technically connected to at least one and/or two or several license key handlers.
